1	Модуль 3. Sales and products.	A job interview. You are going to apply for the job of a Personnel Manager (PM) and you are invited to the interview. Think of how you will be dressed, what you will say, how you will answer questions, what you will do in embarrassing situations, how you will carry yourself in general.
2	Модуль 7. Types of economy.	In groups, read the following descriptions of problems managers had when doing business abroad. Choose one and discuss what you think caused the misunderstanding. Present your interpretation of the problem to see if the rest of the class agrees with it. Could these situations cause conflict or misunderstandings in your country?
3	Модуль 9. Production.	You are a cross-cultural consultant hired by a foreign executive who is going to do business for the first time in your country or a country you know well. Prepare some advice to give your client about business practices. Use these topics to help you.
4	Модуль 10. Companies.	Like Patagonia, many companies sponsor, or contribute money towards, events or activities to maintain their image or to create a

		<p>new image. Sponsorship can cover a whole range of activities including sport, education and local community projects depending on the type of image the company wants to project. For example, IBM sponsored the 2000 Olympic Games in Sydney, and Coca-Cola sponsors 151 American college students every year Speaking.</p> <p>1) In pairs, make a list of companies which sponsor activities like those mentioned above. What kind of image does each company want to project through its sponsorship?</p> <p>2) In groups, choose one of the following projects which need sponsorship.</p>
5	Модуль 12. Demand and supply.	<p>Work in small groups. You have decided to set up your own business together and have approached the bank for advice. They have asked you to prepare a business plan. Decide what type of business you are going to set up, then discuss each of the points listed in the business plan. When you have finalized all the details of your business, prepare a written plan to give to the Bank.</p>
6	Модуль 18. Commodity markets.	<p style="text-align: center;">Giving a presentation</p> <p>When you give a presentation you have to make it as easy as possible for your audience to follow what you are saying. To do this you have to make it clear what you are going to do in each part of your talk, and when you have finished one section and are moving on to the next.</p> <ol style="list-style-type: none"> <li>a. explain the order of your talk;</li> <li>b. repeat something;</li> <li>c. draw attention to visual aids;</li> <li>d. make a transition from one section to another.</li> </ol>

### **Шкала оценивания: 3 балльная.**

Критерии оценивания:

**3 балла** (или оценка «отлично») выставляется обучающемуся, если задача решена правильно, в установленное преподавателем время или с опережением времени, при этом обучающимся предложено оригинальное (нестандартное) решение, или наиболее эффективное решение, или наиболее рациональное решение, или оптимальное решение.

**2 балла** (или оценка «хорошо») выставляется обучающемуся, если задача решена правильно, в установленное преподавателем время, типовым способом; допускается наличие несущественных недочетов.

**1 балл** (или оценка «удовлетворительно») выставляется обучающемуся, если при решении задачи допущены ошибки некритического характера и (или) превышено установленное преподавателем время.

**0 баллов** (или оценка «неудовлетворительно») выставляется обучающемуся, если задача не решена или при ее решении допущены грубые ошибки

- d)*both goods and services

Most people work to earn a living, and produce goods and services. Goods are either agricultural (like maize and milk) or manufactured (1) (\_\_\_\_\_). Services are such things as education, medicine and commerce. Some people provide goods; some provide services. Other people provide (2)\_\_\_\_\_. For example, in the same garage a man may buy a car or some service which helps him to maintain his car.

The work people do is called economic activity. All economic activities together (3)\_\_\_\_\_ a town, a city, a country or the world. Such an economic system is the sum-total of what people do and what they want. The work people undertake either provides what they need or provides the money with which they can buy essential commodities. Of course, most people hope to earn enough money to buy commodities and services (4)\_\_\_\_\_ but which provide some particular personal satisfaction, like toys for children, visits to the cinema and books.

##### **4. Задание на установление соответствия:**

- a) to the laws made by their governments
- b) 'economically free'
- c) with workers' health, wages and pensions
- d) their employees work

If a person can do what he wishes with his own property, time, and energy, then economists say that he is (1) \_\_\_\_\_. In all communities, of course, limits are

imposed upon the personal freedom of their citizens and these limits are in some cases very complex but in others relatively simple. All individuals are required to conform (2)\_\_\_\_\_. Complete economic freedom of action can create great difficulties, because the freedoms exercised by various individuals often conflict. If citizens were completely free, some landowners might build factories in unsuitable places, while some factory-owners might make (3) \_\_\_\_\_ too long each day. If they were completely free, workers might stop working when they got their first pay, and come back only when they needed more money. Such economic anarchy could cause instability (unemployment; loss of production etc.) in the whole economy of a country.

Laws related to economic conditions are sometimes concerned with contracts between employers and employees. Sometimes they are concerned (4) \_\_\_\_\_, and sometimes with the location of places of work. Sometimes they protect the interests principally of the workers, while at other times they may be beneficial towards the employers.

#### **4.Задание на установление соответствия:**

- a) in control and long-term plans
- b) in a rigidly controlled economy
- c) called mixed economies
- d) as the National Economic Development Council

It has been found necessary in many countries, even in such dedicated strongholds of free enterprise as the USA, to control or regulate national economic conditions. The under-developed countries of the world are inevitably interested (1) \_\_\_\_\_ guided by the government. India has had a number of plans guided by the government. India makes a clear distinction between the public sector and the private sector of its economy. Systems of this type are sometimes (3)\_\_\_\_\_.

In 1962 the government set up an official planning body to guide national economic policies. This body is known (3)\_\_\_\_\_. The members of the NEDC are representatives of the employers' federations, and the Trades Union Congress, together with members of the government, eminent industrialists and leading economists.

The main function of the NEDC is planning national production and setting up production targets. It is however a very difficult matter to plan ahead in a mixed economy. It is not possible to plan ahead with any certainty even (4)\_\_\_\_\_, because natural disasters, political changes and other factors can affect the general plan in unexpected ways.

- c) considerable economic freedom of choice
- d) upon personal freedom

Britain is similar to the USA. It has an economic system based on private enterprise and private supplies of capital. An important form of capital is surplus income available for investment in new business activities. Property in both the US and Britain can be and is owned by individual citizens and these citizens exercise (1)\_\_\_\_\_. They can choose what they want to do and how they want to earn their living, but are not of course entirely free to do as they wish. They must obey the law. Otherwise, however, they can use their time, money and energy (2)\_\_\_\_\_. If a person can do this, then economists say that he is economically free. In all communities, of course, limits are imposed (3)\_\_\_\_\_, limits which are sometimes very complex.

Complete economic freedom of action can create great difficulties because the freedoms exercised by various individuals inevitably conflict. If citizens were completely free, some landowners might build factories in unsuitable places, while some factory owners might make their employees work too long each day. If they were completely free, workers might stop working when they got their first pay, and come back only when they needed more money. (4)\_\_\_\_\_ could create instability in the entire economy of a country.

*a)* ahead over a number of years.

*b)* in communist countries

*c)* with complete power

*d)* to supply and demand

The important thing about the communist system is central; planning. The State organizes the whole economic effort of the nation. The central authority (1)\_\_\_\_\_decides what goods and services will be produced. The authority decides what quantities of goods will be produced, and also controls their quality, and decides where they will go and what prices will be charged for them. Additionally, the State provides all (or most of) the services which the citizens require. It is responsible for the economy and is therefore concerned with methods of production as well as quality and quantity. The national economy must be planned (2) \_\_\_\_\_

Marxist economies are planned. The system is related to the needs of the State as a whole not the needs of the private person. The emphasis is collective and not individual, so that the individual is subordinated to the needs of the collective State.

The central authority (3)\_\_\_\_\_ performs the function of the price system in capitalistic economies. Under capitalism the prices of goods and services are related

(4)\_\_\_\_\_. The system operates freely, dependent upon the quantities available and what people want.

No state today completely communistic or completely capitalistic. The various national economic systems tend towards one type or the other, but many are difficult (1)\_\_\_\_\_. It has been found necessary in many countries to exercise some degree of control over national economic conditions, and under-developed nations particularly

are interested in long-term plans. Countries like India have had a number of plans guided (2)\_\_\_\_\_. India makes a clear distinction between the public sector and the private sector of its economy and so has a system called a mixed economy.

Britain today has a mixed economy. In the public sector are the nationalized industries like coal and steel, British Rail and BOAC. In the private sector are the majority of the nation's industries, from giants (3)\_\_\_\_\_ down to small family businesses. In 1962 the British government set up an official planning body known as the National Economic Development Council, a body which (4)\_\_\_\_\_and set up production targets. The members of the NEDC are representatives of both the employers' federations and the TUC, together with members of the government, eminent industrialists and leading economists.

- a) no better or worse
- b) with each successive purchase
- c) over short periods of time
- d) this same fixed price

In most economic systems, the prices of the majority of goods and services do not change (1)\_\_\_\_\_. In some systems it is of course possible for an individual to bargain over prices, because they are not fixed in advance. In general terms, however, the individual cannot change the prices of the commodities he wants. When planning his expenditure, he must therefore accept these fixed prices. He must also pay (2)\_\_\_\_\_ no matter how many units he buys. A consumer will go on buying bananas for as long as he continues to be satisfied. If he buys more, he shows that his satisfaction is still greater than his dislike of losing money. (3)\_\_\_\_\_ however, his satisfaction compensates *less* for the loss of money.

A point in time comes when the financial sacrifice is greater than the satisfaction of eating bananas. The consumer will therefore stop buying bananas at the current price. The bananas are unchanged; they are (4)\_\_\_\_\_ than before. Their marginal utility to the consumer has, however, changed. If the price had been higher, he might have bought fewer bananas; if the price had been lower, he might have bought more.

#### 4.Задание на установление соответствия:

- a) about the Law of Supply
- b) over-production of any commodity
- c) either locally or throughout the world
- d) as quickly as possible

Bananas are a typical example of perishable goods. By 'perishable' we mean goods which cannot be stored for any length of time without going bad. Most foodstuffs are in the perishable category. Such goods are offered for sale (1)\_\_\_\_\_, and so the supply of

perishables and the stock of perishables available at any time are usually the same in quantity.

This is not true in the case of non-perishable goods like coal, steel and cars, which do not deteriorate easily. The supply of cars on the market may not be the same as the actual stock of cars in the factories. Economists talk (2) \_\_\_\_\_, in which a rise in prices tends to increase supply, while a fall in prices tends to reduce it. If prices rise for a particular commodity, the rise will of course 'encourage producers to make more. On the other hand, if prices fall (3) \_\_\_\_\_, producers will reduce production. This can result in serious difficulties for many producers, and may cause them to go out of business completely. (4) \_\_\_\_\_ can also create difficulties, because it can lead to a glut on the market, which may cause prices to fall sharply.

- a) with response to demand
- b) our scale of preferences
- c) in this scale of preferences
- d) for particular goods or services

Elasticity of supply, as a response to changes in price, is related to demand. Economists define 'demand' as a consumer's desire or want, together with his willingness to pay for what he wants. We can say that demand is indicated by our willingness to offer money (1)\_\_\_\_\_. Money has no value in itself, but serves as a means of exchange between commodities which do have a value to us.

People very seldom have everything they want. Usually we have to decide carefully how we spend our income. When we exercise our choice, we do so according to our personal scale of preferences. (3)\_\_\_\_\_ essential commodities come first (food, clothing, shelter, medical expenses etc.), then the kind of luxuries which help us to be comfortable (telephone, special furniture, insurance etc.), and finally those non-essentials which give us personal pleasure (holidays, parties, visits to theatres or concerts, chocolates etc.). They may all seem important, but their true importance can be measured by deciding which we are prepared to live without. Our decisions indicate (3)\_\_\_\_\_ and therefore our priorities.

Elasticity of demand is a measure of the change in the quantity of a good (4)\_\_\_\_\_. The change in demand results from a change in price.

*a)* between different people and between different nations

*b)* in buying more paper

*c)* useful in peacetime

*d)* by different things

Basic human needs are simple, but every individual has additional personal wants which may be very complex. These complex personal wants are satisfied in different ways (1)\_\_\_\_\_. A car, a bottle of whisky and a newspaper satisfy very different wants and the whisky is not a close substitute for the car. This\_ special characteristic of satisfying a want is known in economics as its 'utility'. Utility is not the same as usefulness. A submarine, for example, may or may not be (2)\_\_\_\_\_, but it satisfies a want. Many nations want submarines. Economists describe this kind of utility as 'the relationship between a consumer and a commodity'.

Utility varies (3)\_\_\_\_\_. A vegetarian does not want meat, but may rate bananas very highly. A mountain-republic like Switzerland has little interest in submarines, while maritime nations rate them highly. Utility also varies with time. In time of war, the utility of bombs is high and that of pianos is low. Utility is therefore

related to our sense of priorities. The utility of a commodity is also related to the quantity available to the consumer. If men buy a large quantity of paper, they will lose interest (4)\_\_\_\_\_. The demand for paper will go down. The utility of a commodity consequently decreases as the consumer's stock increases.

### **4. Задание на установление соответствия:**

a) to pay very high prices

- b)* to make more of that commodity
- c)* in the area of demand
- d)* their personal scale of preferences

If the prices of a particular commodity rise in the economy as a whole, the rise will naturally encourage producers (1)\_\_\_\_\_. If, on the other hand, prices fall locally or throughout the world, producers will reduce production. Supplies of many commodities can generally be adjusted to suit market conditions. This means that changes in market prices lead to changes in the quantity of a particular commodity made available to consumers. Household goods and furniture are in this category. In such instances, supply is said to be elastic, because it can be increased or decreased rapidly to suit market prices.

The principle of elasticity operates (2)\_\_\_\_\_ as well as in the area of supply. People very seldom have everything they want. They usually have to choose carefully how they will spend their money. When they exercise this choice, they work according to (3)\_\_\_\_\_, beginning with top-priority essentials like food and housing. Next on their scale come those commodities which provide comfort or convenience of some kind (telephones, insurance etc.) and finally come the non-essentials like holidays and trips to the theatre, which are important parts of life but not comparable with food and shelter. If it is necessary (4)\_\_\_\_\_ for the essentials of life, people pay them—even if this means spending all their income. In such cases demand is inelastic. For non-essentials, however, demand is elastic and particularly responsive to changes in price.

*b)* a religious or subjective standard  
*c)* with these services

Money is not only a means of exchange but is also a means of measuring the value of men's labour. In economic theory, 'labour' is any work undertaken in return for a fixed payment. The work undertaken (1)\_\_\_\_\_ for her children may be hard work, but it receives no fixed payment. It is not therefore labour in the strict economic sense.

As a scientist, the economist is interested in measuring the services which people render to each other. Although he is aware of the services which people provide for no financial reward, he is not concerned (2)\_\_\_\_\_. He is interested essentially in services which are measurable in terms of money payments of a fixed and/or regular nature. In economics, money is the standard by which the value of things is judged. This standard is not (3)\_\_\_\_\_, but an objective and scientific one.

Human labour produces both goods and services. The activities of a farmworker and a nurse are very different, but both are measurable in terms of payment received. Labour (4)\_\_\_\_\_ is not concerned with distinctions of social class, but simply with the payment of wages in return for work.

**4. Задание на установление соответствия:**

- a) on previous business activities
- b) be public and collective
- c) in a business
- d) in providing capital

There is always an element of risk (1)\_\_\_\_\_ and starting a business. The business may not be successful. The employees of the business do not bear this risk, but the employers and the providers of capital do bear it. If the business is successful, the risk has been justified and the invested capital earns part of the profits as a return on the investment.

The capital which people provide to help new businesses is an accumulation of previous surpluses (2)\_\_\_\_\_. In this way the past is used to finance the future. Such capital is accumulated by a deliberate policy of saving surpluses. This policy may be personal and individual, or it may (3)\_\_\_\_\_. As such, it is common to both the capitalistic and communistic systems. In both systems, a certain part of the profits is 'ploughed back' into the system in order to create capital. In general terms, capital can be defined as (1) a factor of production (for example, machinery or cash); (2) the assets possessed by a person, a company or a nation. Land, houses and shares (4)\_\_\_\_\_ are capital. In terms of the state, all railways, docks, roads, airports and state funds of money are part of the nation's capital.

The term 1) \_\_\_\_\_, as used by economists, is an extension of the ancient idea of a market as a place where people gather to buy and sell goods. In former days part of a town was kept as the market or marketplace, and people would travel 2) \_\_\_\_\_ on special market-days in order to buy and sell various commodities. Today, however, markets such as the world sugar market, the gold market and the cotton market do not

need to have any fixed geographical location. Such a market is simply a set of conditions permitting buyers and sellers to work together.

In a free market, competition takes place among sellers of the same commodity, and among those who wish to buy that commodity. Such competition influences the prices prevailing in the market. Prices inevitably fluctuate, and such fluctuations are also affected by current 3) \_\_\_\_\_.

Whenever people who are willing to sell a commodity contact people who are willing to buy it, a market for that commodity is created. Buyers and sellers may meet in person, or they may communicate in some other way: by letter, by telephone or through their-agents. In a perfect market, communications are easy, 4) \_\_\_\_\_ are numerous and competition is completely free.

- c) distinct from the sole trading opportunities
- d) examines all special arrangements and mergers

State planning and central control of the economy often mean that a state government has the monopoly of important goods and services. Some countries have state monopolies in basic commodities like steel and transport, while other countries have monopolies (1)\_\_\_\_\_ as matches. Most national authorities monopolize the postal services within their borders.

A different kind of monopoly arises when a country, through geographical and geological circumstances, has (2)\_\_\_\_\_ or important services, as for example with Canadian nickel and the Egyptian ownership of the Suez Canal. Such monopolies can be called natural monopolies. They are very different from legal monopolies, where the law of a country permits certain producers, authors and inventors a full monopoly over the sale of their own products.

These three types of monopoly are (3)\_\_\_\_\_ which take place because certain companies have obtained complete control over particular commodities. This action is often called 'cornering the market' and is illegal in many countries. In the USA anti-trust laws operate to restrict such activities, while in Britain the Monopolies Commission (4)\_\_\_\_\_ which might lead to undesirable monopolies.

Capital in this instance is simply the accumulation of previous surpluses on previous business activities. In this way .the past is used to finance the future. The accumulation of capital is almost always deliberate, either on the part of individual citizens or on the part of the state. (1)\_\_\_\_\_ a certain part of the surplus achieved in any enterprise is 'ploughed back' into the system in order to promote further growth.

When capital, labour and enterprise combine to make a new business successful, the business must still continue to compete on the market with other companies producing the same type of commodity. The term 'market', (2)\_\_\_\_\_, is a logical extension from the idea of a place set aside for buying and selling. Formerly, part of a town was kept as a marketplace, and country people would come in on market-days to buy and sell. Markets today need not however (3)\_\_\_\_\_: the sugar market and the cotton market are not geographical locations, but simply sets of conditions which permit buyers and sellers to work together.

In a free market, competition takes place among sellers in order to sell their commodities (4)\_\_\_\_\_ and among buyers in order to obtain what they want at a price which suits them. Such competition influences prices.

**Шкала оценивания результатов тестирования:** в соответствии с действующей в университете балльно-рейтинговой системой оценивание результатов промежуточной аттестации обучающихся осуществляется в рамках 100-балльной шкалы, при этом максимальный балл по промежуточной аттестации обучающихся по очной форме обучения составляет 36 баллов, по очно-заочной и заочной формам обучения – 60 баллов (установлено положением П 02.016).

Максимальный балл за тестирование представляет собой разность двух чисел: максимального балла по промежуточной аттестации для данной формы обучения (36 или 60) и максимального балла за решение компетентностно-ориентированной задачи (6).

Балл, полученный обучающимся за тестирование, суммируется с баллом, выставленным ему за решение компетентностно-ориентированной задачи.

Общий балл по промежуточной аттестации суммируется с баллами, полученными обучающимся по результатам текущего контроля успеваемости в течение семестра; сумма баллов переводится в оценку по дихотомической шкале следующим образом (привести одну из двух нижеследующих таблиц):

Соответствие 100-балльной и дихотомической шкал

Сумма баллов по 100-балльной шкале	Оценка по дихотомической шкале
100-50	зачтено
49 и менее	не зачтено

**Критерии оценивания результатов тестирования:** Каждый вопрос (задание) в тестовой форме оценивается по дихотомической шкале: выполнено – 2 балла, не выполнено – 0 баллов.

**The Irish language today**

Until about the 17<sup>th</sup> century, Irish was the normal everyday language of Ireland. At that time, though, the British who had colonized the country began to impose their own language and the Irish people gradually accepted this, mostly for economic reasons. All official business was conducted in English and the British economy dominated the country. This practical motivation to use English grew even stronger when people began to leave Ireland in vast numbers in the 19<sup>th</sup> century. Families thought that it would be difficult to move to an English-speaking country such as America, Australia or England if they knew nothing but Irish.

Nowadays it is estimated that little more than one per cent of the population of the country use Irish as their daily first language. Even in the areas of the country, which are supposed to be Irish-speaking, the use of the language is decreasing. These areas, known officially as the 'Gaeltacht', are mainly in the remote far west of the country and have a total population of 83,000, of whom nearly all can speak Irish, although only about 30,000 use it as their normal language of communication.

All children in Ireland have to learn Irish. Until 1973 pupils had to gain a pass in Irish if they were to be awarded their school-leaving certificate. This rule was very unpopular and was dropped. Pupils still have to take Irish for these examinations but it no longer seems to matter very much if they fail. \*

Most children in primary schools seem to enjoy their Irish lessons but in secondary schools the situation is often different. As examination pressure mounts, pupils often find Irish to be boring and irrelevant, as compared with French or German, which can at least be useful for getting a job.

The most surprising development of recent years has been the rapid rise in the number of state schools in towns that do all their main teaching in Irish. This is not a scheme imposed by the state but one that has grown up in response to the demands of parents. Some parents send their children to these schools for patriotic reasons, believing them to be a defence against the country being swamped with American and English culture. Many other parents choose these schools simply because they see them as being better than the English language schools. They tend to be newer and to have smaller classes and better-motivated teachers. One criticism made of these schools is that they could be distracting pupils from learning 'more useful' modern languages. In fact, in modern languages, as in most subjects, these schools have results,

which are better than the national average.

Only time will tell whether the new rise in Irish in the towns will compensate for its decline in the Irish-speaking areas of the rural west.

Australia

Australia is a continent, a country and an island of 7700 million square kilometers. It is sixth largest country after Russia, Canada, China, the United States of America, Brazil and the smallest continent in the world. Australia is located to the south of Asia, between the Pacific and Indian oceans.

Australia is the world's driest continent. Huge areas of land are so dry that they are uninhabited. There are rainforest in the north, snowfields in the southeast, desert in the center and fertile croplands in the south and southwest. Australia is also the flattest continent after Antarctica.

Australia is situated in the southern hemisphere. That's why it has summer when we have winter. It is interesting to know that January is the hottest month in Australia.

Australia has a population of about 18 million people. 70 per cent live in its 10 largest cities. Most of the population is in the southeastern corner of the country and only 15 per cent of the population lives in rural areas. Canberra is the capital of Australia. It is not the biggest city. Sydney and Melbourne are much bigger. Australia is a multicultural society. People from about 200 nations live there. The Aborigines, the Australian natives, represent about 1.5 per cent of the population.

Australia's coat of arms - the official emblem of the Australian Government - was

granted by King George V in 1912. The arms consist of a shield containing the badges of the six states. The supporters are native Australian fauna - a kangaroo and an emu. A yellow-flowered native plant, wattle, also appears in the design.

The flag of Australia is the only one to fly over a whole continent. The small Union Jack represents the historical link with Britain, the large seven-pointed star represents the six states and the territories, and the small stars from the Southern Cross - a prominent feature of the southern hemisphere night sky. In 1984 Australia officially adopted green and gold as its national colors.

Australian's best-known animals are the kangaroo, the koala and the dingo (a wild dog). There are 50 species of kangaroo. Some stand as tall as a man some are as small as a cat. They can often be seen in many of the forests and parks. The koala is the best loved of all Australian animals. The koala lives on leaves alone. The emu is the most interesting bird in Australia. It is big and cannot fly. The kookaburra is another interesting Australian bird. It cannot sing, but laughs like a human!

The value of money is basically its value as a medium of exchange, or, as economists put it, its 'purchasing power'. This purchasing power is dependent on supply and demand. The demand for money is reckonable as the quantity needed (1)\_\_\_\_\_. An increase in business requires an increase in the amount of money coming into general circulation. But the demand for money is related not only to the quantity of business but also to the rapidity with which the business is done. The supply of money, on the other hand, is the actual amount in (2)\_\_\_\_\_ business purposes. If too much money is available, its value decreases, and it does not buy as much as it did, say, five years earlier. This condition is known as 'inflation'.

Banks are closely concerned with the flow of money into and out of the economy. They often (3)\_\_\_\_\_ in efforts to stabilize economies and to prevent inflation. They are specialists in the business of providing capital, and in allocating funds on credit. Banks originated as places to which people took (4)\_\_\_\_\_, but today the great banks of the world have many functions in addition to acting as guardians of valuable private possessions.
