## ВВЕДЕНИЕ

Роль иностранного языка как средства общения и взаимопонимания становится в настоящее время еще более значимой вследствие определенных факторов, характерных для современного общества: расширение международных экономических, политических и культурных связей; развитие международных средств массовой коммуникации; открытость политики государства мировому сообществу.

Прагматический аспект изучения иностранного языка тесным образом связан с наличием потребности его применения в повседневной жизни и в ситуациях профессионального общения.

Изучение иностранного языка – это осознанная целенаправленная деятельность, ориентированная на усвоение структурных характеристик иностранного языка, таких как фонетика, лексика, грамматика. Данные методические указания ставят своей задачей помочь студентам направления подготовки «Таможенное дело» найти наиболее эффективные пути формирования умений и навыков языковой компетенции, необходимых для осуществления профессиональной коммуникации.

В условиях реализации новой модели образования самостоятельная работа студентов наряду с практическими занятиями составляют важную часть теоретической и профессиональной практической подготовки обучающихся. Она позволяет не только углублять, расширять, систематизировать знания, полученные во время аудиторных занятий, но и самостоятельно овладевать новым учебным материалом.

Методические указания для самостоятельной работы по дисциплине «Иностранный язык в профессиональной сфере (английский)» являются составной частью УМК для специальности 38.05.02 Таможенное дело.

## РЕКОМЕНДАЦИИ ПО ОРГАНИЗАЦИИ САМОСТОЯТЕЛЬНОЙ РАБОТЫ

Для организации эффективной самостоятельной работы над иностранным языком необходимо научиться следующему:

- планировать собственную учебную деятельность;
- выбирать наиболее оптимальные средства решения поставленных учебных задач;
- использовать различные виды работ со справочной и учебной литературой в процессе выполнения учебной задачи;
- осуществлять самоконтроль в процессе учебной деятельности.

*Работа над текстом* – один из важнейших компонентов познавательной деятельности, который направлен на извлечение информации из письменного источника. Рекомендуется следующий порядок действий:

1. Просмотрите текст и постарайтесь понять, о чем идет речь.
2. При повторном чтении разделите сложносочиненные или сложноподчиненные предложения на самостоятельные и придаточные, выделите причастные обороты или другие конструкции.
3. Найдите подлежащее и сказуемое и, поняв их значение, переведите последовательно второстепенные члены предложения.
4. Если предложение длинное, определите слова и группы, которые можно временно опустить для выяснения основного содержания предложения. Не ищите в словаре сразу все незнакомые слова, попробуйте догадаться об их значении по контексту.
5. Внимательно присмотритесь к словам, имеющим знакомые вам корни, суффиксы, приставки. При этом обратите внимание на то, какой частью речи являются такие слова.
6. Слова, оставшиеся непонятными, ищите в словаре.

### *Работа со словарем*

1. Повторите английский алфавит. Это поможет находить слова не только по первой букве, но и по всем остальным.
2. Запомните обозначения частей речи:  
*n* – noun – имя существительное  
*v* – verb – глагол  
*adj.* – adjective – имя прилагательное и т.д.
3. Из нескольких значений слова в словарной статье постарайтесь подобрать близкое по смыслу, связав с общим смыслом предложения.
4. Помимо словарей общеупотребительной лексики пользуйтесь терминологическими словарями по своей специальности.

### *Работа над лексикой*

Запоминание лексики обычно бывает основной трудностью при изучении иностранного языка. Без знания слов не может быть знания языка. Нужно проделать большую и осознанную работу, прежде чем будет усвоен необходимый словарный минимум профессиональных терминов.

Встречая новое слово, всегда анализируйте его, обращая внимание на написание, произношение и значение. Часто можно найти сходство с аналогичным или сходным русским словом, например, *passenger* – пассажир и др. Важно также научиться подмечать родство новых слов с уже известными. Однако, есть слова, не поддающиеся никакому анализу. Их надо постараться запомнить, но механическое повторение не всегда эффективно. Попробуйте следующий порядок работы:

- произнесите новое слово сначала изолированно;
- произнесите словосочетание из текста с новым словом;
- подберите к новому слову синонимы или антонимы (если это возможно);
- выполните письменно лексические упражнения после текста.

### *Работа над грамматикой*

Формирование речевого грамматического навыка предполагает воспроизведение различных грамматических явлений в ситуациях, типичных для профессиональной коммуникации и адекватное грамматическое оформление высказываний. Работая над грамматикой, следует придерживаться следующих действий:

- прочтите развернутый теоретический материал по изучаемой теме в учебнике по грамматике английского языка;
- изучите справочную таблицу в приложении к данному пособию;
- найдите в тексте урока изучаемую грамматическую структуру;
- обозначьте имеющиеся грамматические ориентиры;
- сделайте письменно упражнения;
- варьируйте содержание предложений в имеющихся моделях, заменяя слова в зависимости от меняющейся ситуации;
- сопоставьте / противопоставьте изучаемую структуру ранее изученным;

Переход от навыков к умениям обеспечивается посредством активации новых грамматических структур в составе диалогических и монологических высказываний по определенной теме. Включайте освоенный материал в беседы и высказывания по пройденным темам.

## **UNIT 2**

### **CUSTOMS AREAS**

#### **Ex. 1 Read and translate the text**

#### **The customs areas include the following:**

##### **1. Duty collection**

The assessment and collection of duties and taxes have always been one of the main functions of the customs service. In fact, collection of the revenue is the responsibility with which the customs usually started. Throughout its history the customs has supplied the federal budget with the revenue necessary for investment

in the economy and in the country's basic infrastructure, i.e. new schools, roads, hospitals.

### **1. Classification**

Merchandise classification is the foundation on which duty collection occurs. All goods entering the country should be classified by use of the established numerical coding system. Most countries are now adopting the Harmonized System of Classification which, in case of uniform application, can help improve the classification of goods and prevent losses of duty collection.

### **3. Appraisalment**

Cargo shipments entering the country are to be supplied with the necessary documents, for example, commercial invoices. This cargo declaration is a basis for goods valuation. Undervaluation can result in underpayment of duties.

### **4. Passenger inspection**

Effective passenger and baggage control is necessary to collect proper duty and to prevent smuggling. Baggage is checked for concealment by X-ray or opening it.

### **5. Cargo inspection**

Cargo shipments are to be inspected for duty collection and anti-smuggling purposes. Various inspectional techniques and devices can help release merchandise quicker, with less damage and also result in increased seizures of prohibited items.

### **6. Free trade zones**

In order to encourage the development of the country and to promote its foreign trade free trade zones are usually set up. "A free zone" is a part of the territory which is regarded as being outside the Customs territory, and goods introduced into this part of the territory are not subject to the usual Customs control. Relief from import duties and taxes in respect of these goods is granted. The Customs carries out certain control within the free zone to ensure that the operations are in accordance with the Customs regulations.

### **7. Bonded warehouses**

Importers usually have to pay duties to the government when they import goods. They declare goods and customs officials collect duties. When the importer doesn't pay the duty immediately, the goods are stored in a bonded warehouse. The importer has to pay storage charges (cost of keeping the goods in the warehouse). The goods cannot be taken out of the warehouse until the importer pays the duties.

### **8. Canine enforcement**

Use of dogs specially trained to smell drugs helps expedite customs examination process with less damage than some more traditional methods of inspection may cause.

### **9. Smuggling information collection**

Collection and analysis of various information on smuggling results in better understanding of smuggling trends and the modus operandi of individuals or organizations breaking customs laws.

### **10. Investigation**

Investigation of customs violations is performed to target the more sophisticated violators of customs laws and regulations. The full range of customs violations can be investigated: the smuggling of merchandise, narcotics, arms and ammunition as well as commercial fraud, currency violations and money laundering, internal corruption, infringement of trademark and intellectual property rights (IPR) etc.

### **11. Laboratory procedures**

Laboratory analyses are to be performed in order to classify merchandise and collect the correct amount of duty. The new Harmonized System of classification is much more dependent on laboratory analysis than most prior classification systems.

### **12. Customs brokers**

Brokers must pass an examination and obtain a license from the Customs central administration to do business. Brokers are to consult customs to determine the proper rate of duty or basis for appraisalment. Brokers are required to maintain strict confidence about business and transactions.
